

Functional Requirements Document (FRD)

Project: Cafe & Caffeine Online Ordering & Delivery System

1. Document Control

Author: Sakshi Kamble (Business Analyst)

Version: 1.0

Description: Initial FRD

Approvers:

- Ms. Pam (Business Owner)
- Operations Manager
- Project Sponsor

2. Overview

This document describes the functional and non-functional requirements for the Cafe & Caffeine Online Ordering & Delivery System. The purpose of this document is to define how the system will fulfill the business requirements identified in the BRD.

3. Glossary

BRD - Business Requirements Document

FRD - Functional Requirements Document

RTM - Requirements Traceability Matrix

TAT - Turnaround Time

Customer Portal - Interface used by customers

Staff Portal - Interface used by staff members

4. Scope

The system will allow customers to browse menu items, place online orders, make payments, and receive order confirmations. Staff members will be able to view customer orders and delivery information through a dedicated portal.

5. Functional Requirements

FR-01: The system shall display the complete menu to customers.

FR-02: The system shall display detailed product information when a customer selects a menu item.

FR-03: The system shall allow customers to add products to a shopping cart.

FR-04: The system shall allow customers to enter delivery address details.

FR-05: The system shall validate mandatory fields before order submission.

FR-06: The system shall allow customers to make online payments.

FR-07: The system shall generate an order confirmation after successful payment.

FR-08: The system shall send an email confirmation to the customer after order placement.

FR-09: The system shall prevent customers from modifying orders after successful submission.

FR-10: The system shall allow staff members to view incoming orders.

FR-11: The system shall allow staff members to view customer delivery addresses.

FR-12: The system shall allow the owner to add, edit, and remove menu items.

FR-13: The system shall maintain order history records.

FR-14: The system shall allow staff to update order status.

6. Supporting Models

Supporting models for this project include:

- Use Case Diagram

7. Non-Functional Requirements

NFR-01: The system shall respond within 2 seconds of user input.

NFR-02: The system shall maintain 99% monthly availability.

NFR-03: The system shall support at least 100 concurrent users.

NFR-04: Customer payment information shall be transmitted securely.

NFR-05: The system shall maintain customer data confidentiality.

NFR-06: The application shall be accessible through desktop and mobile devices.

NFR-07: The system shall recover from failures with minimal downtime.

8. RAID Log

Risks:

- Payment gateway downtime
- System performance issues during peak hours

Assumptions:

- Customers have internet connectivity
- Payment gateway services are available

Issues:

- Manual ordering process causes delays
- Customers lack visibility into menu offerings

Dependencies:

- Payment gateway integration
- Email notification service
- Internet connectivity

9. Validation

The following validation activities will be performed:

- Requirement Review
- Stakeholder Approval
- Functional Testing
- User Acceptance Testing (UAT)
- Verification against BRD requirements

10. Reference Documents
