

Cafe & Caffeine Online Ordering System

Requirement Gathering Document

Problem Statement

Cafe & Caffeine is a well-known neighborhood cafe owned by Ms. Pam, recognized for its strong coffee, handcrafted beverages, and sweet treats. The café attracts a diverse customer base, including corporate professionals, students, and local residents who frequently visit the store or place orders through phone calls.

As the customer base has grown, the cafe has started experiencing operational challenges in managing customer orders efficiently. Customers who wish to place delivery orders must provide their address and order details manually over the phone, which often results in longer ordering times, communication errors, and delays in processing orders. Additionally, customers have limited visibility into the complete menu, newly introduced products, and current offerings, making it difficult for them to make informed purchasing decisions.

From the business perspective, staff members manually record customer orders and delivery information, which increases administrative effort and makes order tracking more difficult. The current process also limits the café's ability to provide a seamless ordering experience and scale its delivery operations as demand increases.

To address these challenges, Ms. Pam has proposed the development of an online ordering platform that will enable customers to browse the menu, view newly launched products, place delivery orders, and complete payments online. The solution will also provide staff members with a dedicated portal to view customer orders, delivery addresses, and order details, improving operational efficiency and customer satisfaction.

Project Objective

Develop an online ordering and delivery platform that streamlines order placement, improves customer experience, reduces manual effort, and enables efficient order management for Cafe & Caffeine.

Stakeholders

- Ms. Pam (Owner)
- Customers
- Staff Members
- Delivery Personnel

Requirement Gathering Summary

Stakeholder	Requirement	Priority
Customer	View complete menu	High
Customer	View newly launched products	High
Customer	Place orders online	High
Customer	Make online payments	High
Customer	Gets an email	High
Customer	Cannot modify order after submission	Medium
Staff	View customer orders	High
Staff	View customer delivery address	High
Owner	Add and manage menu items	High
Owner	Track order status	Medium

Business Requirements Identified

BR-01: Customers shall be able to view the cafe menu online.

BR-02: Customers shall be able to view newly launched products.

BR-03: Customers shall be able to place orders online.

BR-04: Customers shall be able to make online payments.

BR-05: Customer shall receive an email confirmation after successfully placing an order.

BR-06: Staff shall be able to view customer orders.

BR-07: Staff shall be able to view delivery addresses.

BR-08: Owners shall be able to manage menu items.
